Measure	Proposed Stage 2	Compared to Stage 1
	Core Measures (17)	
CPOE *New denominator for stage 1: optional for 2013, required for 2014*	More than 60% of medication, laboratory, and radiology orders created by the EP during the reporting period are recorded using CPOE	Increases threshold from 30%; adds lab and radiology orders; changes denominator to number of orders; adds "CPOE function must be utilized to create the first record of any type for the order"
eRx	More than 65% of all permissible prescriptions written by the EP are compared to at least one drug formulary and transmitted electronically using Certified EHR Technology (CEHRT)	Increases threshold from 40%; includes new exclusion for EPs with no e-prescribing pharmacies within 25 miles; consolidates drug-formulary check into this measure
Demographics	More than 80% of all unique patients seen by the EP have demographics recorded as structured data	Increases threshold from 50%; includes requirement for selection of multiple races and "declines"
Vital Signs *New ages& exclusion for stage 1: optional for 2013, required 2014*	More than 80% of all unique patients seen by the EP have blood pressure (for patients age 3 and over only) and height/length and weight (for all ages) recorded as structured data	Increases threshold from 50%; changes to ≥ age 3 for BP; separates exclusions for ht/wt and BP
Smoking Status	More than 80% of all unique patients 13 years old or older seen by the EP have smoking status recorded as structured data	Increases threshold from 50%
Clinical Decision Support Intervention (CDSI)	1. Implement 5 clinical decision support interventions related to 5 or more clinical quality measures at a relevant point in patient care for the entire reporting period 2. The EP has enabled and implemented the functionality for drug-drug and drug-allergy interaction checks for the entire reporting period	Adds 4 more CDSIs and requires they be linked to CQMs; consolidates drug-drug and drug-allergy checks into this measure by requiring these in addition to the 5 CDSIs; adds additional info available to clinician for each CDSI; adds "timeliness" requirement for CDSI
Lab Results	More than 55% of all clinical lab tests results ordered by the EP during the reporting period whose results are either in a positive/negative or numerical format are incorporated in CEHRT as structured data	Increases threshold from 40%; moves from menu to core
List of Patients	Generate at least one report listing patients of the EP with a specific condition	Moves from menu to core
Reminders	More than 10% of all unique patients who have had an office visit with the EP within the 24 months prior to the beginning of the reporting period were sent a reminder, per patient preference	Decreases threshold from 20%; moves from menu to core; limits to patients seen within 24 months; includes per patient preference

Measure	Proposed Stage 2	Compared to Stage 1
View, Download & Transmit *Number 1 for stage 1: required in 2014*	1. More than 50% of all unique patients seen by the EP during the reporting period are provided timely (within 4 business days after the information is available to the EP) online access to their health information subject to the EP's discretion to withhold certain information 2. More than 10% of all unique patients seen by the EP during the reporting period (or their authorized representatives) view, download, or transmit to a 3rd party their health information	Replaces e-Access to Health Info and e-Copy of Health Info measures; increases e-access threshold from 10%; includes exclusions for EPs that neither order nor creates the required information or for lack of broadband availability; includes requirement to meet both 1 and 2 to meet the measure; requires action by patient for EP to meet the measure; includes list of required info and requirement of an indication that no info is available, if applicable
Clinical Summaries	Clinical summaries provided to patients within 24 hours for more than 50% of office visits	Shortens from 3 days; adds demographics, smoking status, care plan field and patient decision aids
Patient Education	Patient-specific education resources identified by CEHRT are provided to patients for more than 10% of all office visits by the EP	Moves from menu to core; changes denominator to office visits; includes exclusion for EPs with no office visits
Secure Messaging	A secure message was sent using the electronic messaging function of CEHRT by more than 10% of unique patients seen during the reporting period	Adds new measure; requires action by patient for EP to meet the measure
Medication Reconciliation	The EP performs medication reconciliation for more than 65% of transitions of care in which the patient is transitioned into the care of the EP	Increases threshold from 50%; moves from menu to core
Summary of Care Document	1. The EP that transitions or refers their patient to another setting of care or provider of care provides a summary of care record for more than 65% of transitions of care and referrals 2. The EP that transitions or refers their patient to another setting of care or provider of care electronically transmits a summary of care record using CEHRT to a recipient with no organizational affiliation and using a different CEHRT vendor than the sender for more than 10% of transitions of care and referrals	Increases threshold from 50%; moves from menu to core; eliminates e-Exchange Info; includes care plan (with its own definition and required elements), team members as required data and list of additional required data; incorporates up-to-date problem, med and med allergy lists – may not have blank fields; limits numerator to only transmissions that conform to proposed transport standards
Submit Immunization Data *"except where prohibited" for stage 1: required 2014*	Successful ongoing submission of electronic immunization data from CEHRT to an immunization registry or immunization information system for the entire reporting period	Moves from menu to core; removes a failed submission as meeting the measure; adds "except where prohibited"; expands on exclusions
Protect Health Info	Conduct or review a security risk analysis including addressing the encryption/security of data at rest, and implement security updates as necessary and correct identified security deficiencies as part of the provider's risk management process	Emphasizes encryption [(164.312 (a)(2)(iv) → Implement a mechanism to encrypt and decrypt ePHI]
Clinical Quality Measures	Electronically submit 12 clinical quality measures but NOT A CORE MEASURE.	Requires as a distinct category of meaningful use but not included in core or menu set as of 2013

Measure	Proposed Stage 2	Compared to Stage 1
Menu Measures – must meet 3 of 5 – Exclusion Does Not Equal "Met"		
Imaging Results and Info	More than 40% of all scans and tests whose result is an image ordered by the EP during the reporting period are accessible through CEHRT	Adds new measure
Family Health History	More than 20% of all unique patients seen by the EP during the reporting period have a structured data entry for one or more first-degree relatives	Adds new measure
Submit Syndromic Data	Successful ongoing submission of electronic syndromic surveillance data from CEHRT to a public health agency for the entire reporting period	Removes a failed submission as meeting the measure; expands on exclusions
Submit Cancer Data	Successful ongoing submission of cancer case information from CEHRT to a cancer registry for the entire reporting period	Adds new measure; includes exclusions for EPs that do not diagnose/treat cancer
Submit Specific Case Info	Successful ongoing submission of specific case information from CEHRT to a specialized registry for the entire reporting period	Adds new measure

Comments on the proposed stage 2 requirements must be submitted by May 7, 2012 11:59 PM ET

Go to http://www.regulations.gov/#!submitComment;D=CMS-2012-0022-0001 → Go to ***ENTER INFORMATION*** → Then ***TYPE COMMENT*** and/or ***UPLOAD FILES*** (optional) → And finally ***SUBMIT COMMENT***
